

OUR MANAGED GOLD SUPPORT SERVICE: FLEET

In addition to your standard Fluke Networks Gold Support Service, Networks Centre now offer an exclusive, managed service to help take the stress out of calibrations, services, accessory replacements and technical support.

For more information on our Managed Gold Support Service, contact your account manager today.

Organise Calibration

With your standard Fluke Networks Gold Support, you'll get one free calibration a year. With our Managed Gold Support Service: Fleet, you don't need to worry about when your units are due for calibration. We'll let you know when they're due and we'll also arrange to have them calibrated and collected on a day that suits you.

Arrange Repairs

Free repairs with all costs for collection, repair & return are included with Gold Support but in the case of a unit failure, simply contact us and we will arrange the collection and repair.

Replacement of Faulty Accessories

When you need a replacement accessory like a new battery or adaptor leads, we'll organise the replacement.

Technical Support

Networks Centre have in-house specialists who will try to answer any questions you have regarding the functionality of your test equipment. If required, Networks Centre will escalate to Fluke Networks Technical Support on your behalf who are able to offer expert advice 24/7-365 days a year.
